

Signalfigur

Standard

Framställd i svart 2 mm PEHD-plast, monterad på en galvaniserad stålstång och kan enkelt vikas ihop så att den inte tar så stor plats. Vardera änden är försedd med en Ø 4 x 15 x 30 mm ring för montering av lina.

SMK

Som standardutgåvan men Ø 5 x 20 x 35 mm ring för montering av lina, samt 2 förstärkta öljetter med ½ tums karbinhake för montering av extra styrlinor.

Signalballong standard:

Best. Nr. Signal 151050 300 x 300 mm

Best. Nr. Signal 151062 600 x 600 mm

Signal shape.

Standard

Manufactured in black 2 mm PEHD plastic, mounted on a galvanic steel rod, and it can be easily folded up so it does not take up so much place. At each end is fitted with 30 mm distress ring for fitting of a line

SMK

Is like the standard version, but it is mounted with a 50 mm distress ring for fitting of a line, and there also 2 eyelets with ½" carabiner for attaching additional steering lines.
